

README: How to install our templates

Generated archive must be having files like these:

To install template you must:

- 1) Folders **css**, **images**, **js** + **.htaccess** file - put in root page of your domain (where you installed Smart CJ)
- 2) Go to Smart CJ admin area to this page
http://YOURDOMAIN/scj/admin/?operation=rotation&sub=rot_tube&subsub=rot_cms

Find this section **“Upload Templates”** at the bottom of page

- 3) Browse file **template.sql** from generated archive on your computer and press on button **“Upload Templates”**
- 4) That’s all. Go to you main page of domain and enjoy!

If you need, you also can use **HTML code of layouts** to integrate with others scripts.
